Summer Camps
Inspiring Future Bonnies

Summer camp is a time-honored tradition for many children. Academic summer camps not only allow children to pursue their academic talents, but help them build leadership skills and strive toward their life goals. When youth have the opportunity to work with our faculty to learn about science, technology, engineering and mathematics they often tap into new interests and increase their creative thinking and reasoning through the experience. It is our goal to bring this experience to as many school-aged children as possible.

As such, not every child with the academic interest to participate comes from a family that can easily afford camp. Therefore, we are contacting your business for assistance to help fund scholarships for students who need help with the cost of attending. We are hoping that our camps might be of interest to you as an opportunity to promote your company through a sponsorship arrangement. We offer a variety of sponsorship levels to suit your budget. They are as follows:

$250 Sponsors: company name listed on camp websites, camp T-shirts, and camp banners.

$500 Sponsors: company name & logo listed on camp websites, marketing flyers, posters, camp T-shirts, camp banners, and opportunity to place logo in wrap-up photo slideshow to be given to every participant.

$1000 Sponsors: company name & logo on camp websites, marketing flyers, posters, camp T-shirts, camp banners, email messages to parents and campers, opportunity to place logo in wrap-up photo slideshow to be given to every participant.

Your sponsorship will help children at the following camps and your contribution will be recognized across our camps. This year we are hosting four academic camps:

• **Zometool Building Camp** - (Ages 10-15) Mathematicians, artists, and architects are finding out what kids already know: creating, discovering, and deepening your understanding of the universe with Zometool is fun! Zometool is a toy that ignites the imaginations of our future architects, scientists and engineers and our camp provides a transformational experience where learning and fun align!

• **International STEM Camp** - (Ages 14-18) Foster cultural exchange, experience hands-on learning, and have a great time building friendships. This camp provides a perfect opportunity for a multicultural experience in the USA. Students from different countries will meet and learn with each other at a one-of-a-kind STEM- and leadership-themed camp.

• **Escape Room Creation Camp** - (Ages 10-16) Kids who like real-life adventure games, puzzles and logic will find this interactive camp a great choice! Kids will have the opportunity to experience an escape room scenario then learn about and participate in creating an escape room with their fellow campers! Campers will experience several kinds of escape rooms and work with staff & faculty to learn how to create a great theme and puzzles.

• **Cooking Chemistry Camp** - (Ages 10-16) Kids will get creative in this camp combining cooking and chemistry! Each day the campers will prepare several “recipes/experiments” that will unite science and cooking providing a delicious hands-on learning experience. Of course, the best part of each day is eating the tasty food and desserts!

I hope that after learning about our programs you will consider assisting us with a sponsorship donation. Thank you, in advance, for your consideration of our request. With your help, we can continue to help shape the minds of our future leaders. If you have any questions, please do not hesitate to contact me at 716-375-2045.

Sincerely,

Jennifer Pulver
