Tree Campus USA

Tree Campus USA is a national effort that encourages colleges and universities to engage students and the local community to plant and sustain healthy trees. Members of the Campus Tree Advisory Committee work to establish a campus tree care plan and other standards required for this national recognition.

Solar-powered Golf-Cart

The maintenance department now runs an electric golf cart, powered by solar energy from a panel atop the campus' boiler plant. The solar panel is connected to the vehicles' battery charger. The cart emits no carbon dioxide and the panel saves 60 watt hours of electricity per mile.

Bonas Goes Green
