Moodle 2.x (faculty and staff) Karla Bright	Wednesday, April 10, 2013	3 – 4pm	Library Instructional Lab

Excel Intro part 2	This workshop will pick up where we left off in the Intro to Excel workshop. We will go over the various ways to create and use formulas in Excel, copying formulas, absolute cell references and adding headers and footers to create professional looking reports.
iPad Workshop	In this workshop we will look at a range of applications (apps) for teachers and students. We will demonstrate apps that let you and your students create and collaborate with one another. Learn about some “not so basic” strategies and more.
Excel Intermediate	In this workshop participants will learn will go over importing data into Excel, data manipulation, advanced sorting, filtering, and finding duplicate records
File storage/backup	This workshop will go over how to properly store your files on your computer so that it is easier to locate that file you need. Dan will demonstrate how to backup your files on your work computer and discuss various ways to protect your data so you don't lose your important material.
Intro SPSS	Greg Privitera author of Statistics for the Behavioral Sciences will give us an introduction to the statistical software program SPSS.
Moodle 2.x (faculty and staff)	Come see the new Moodle 2.x! We will be up-grading our Moodle course site to the new version for the summer 2013. Get a first-hand look at the new features designed to make setting up and managing your course easier.
