

Web Developer

St. Bonaventure University has an opening for a full-time Web Developer in the Office of Technology Services. Responsibilities include assisting in the design, development, and implementation of database driven web sites; assisting in the administration of the University web content management system; assist in the design, development, and implementation of projects involving the Datatel administrative system; and act as a backup to the Web Services Manager.

Knowledge of ColdFusion, ASP.Net, PHP, CSS, XML and JavaScript is desired. Knowledge of MSSQL and MYSQL is also desired. Prior experience with Datatel administrative system is preferred but not required. Candidate should possess 2-3 years experience in said environment. Candidate should also possess the ability to work well in groups and on an individual basis. A bachelor's degree in Computer Science or a related field is preferred.

This position will play a key role in providing Web based solutions to the University community.

This is a full-time salaried position with standard benefits due University employees. Seek to fill the position as soon as possible. EOE
