SURVEY RESULTS

The graphics on this page show selected information from recent library surveys.

The library regularly conducts surveys of faculty, staff, and students. The next faculty/staff survey will launch this fall.

Library instruction sessions include a survey at the end. 91% of the class participants complete the survey.

All virtual reference session participants receive a survey. Response rates tend to be low, but satisfaction is high among those who complete the questionnaire.

Further qualitative studies are or will be underway this year, including focus groups to learn more.

Further information on how the library closes the loop on results, as well as full details of our assessments, is available at <https://www.sbu.edu/library/assessment>
