

## **Housing Policy and Procedures**

St. Bonaventure University is dedicated to providing safe, comfortable and inclusive living environments for all students; where individuals are respected and differences celebrated.

The University offers mixed gender and single gender living environments in designated areas of most residential facilities. In all mixed gender locations, each residential bedroom is single gender.

Mixed-gender areas will be identified by the Associate Director of Residence Life prior to the room selection process for upperclassmen, and room placement for new students, based on the level of interest garnered from the housing application process.

Student requests for assignments that fall beyond the stipulations of this policy will be evaluated by the Associate Director of Residence Life and the Vice President for Student Affairs on an individual basis, including access to housing consistent with the student's gender identity.
