

Design Meditation

This program leads students in step-by-step instruction, teaching them how to use basic design principles to create amazing, free flowing works of art. In this no-mistakes method, students learn to experiment with art by working within material and paper constraints to create repetitive patterns. Patterns are layered and extended to create amazingly intricate works from simple, repetitive steps. Projects using this Zentangle method increase focus, heighten creativity, provide artistic satisfaction and an increased sense of personal well-being, and produce original works of art for each and every student! Students will create custom paper tiles, which can be taken home at the end of the school day or hung together to create a class or even school wide mural.
